## Education

**University of California, Berkeley (Graduating Spring 2021)**

Bachelor of Arts, Psychology
Cumulative GPA: 3.743

## Experience

**UCSF Medical Center** Sept. 2019 to Present
**Undergraduate Researcher**

- Developed "Atlas", a patient management mobile application in Swift and Node.js for aggregating longitudinal datasets of patients who received spinal injections.
- Currently beta-testing the app (**website**) using TestFlight, will submit to the App Store.
- Advised by Dr. Patricia Zheng

**UC Berkeley Department of EECS** Aug to Dec. 2019
**Lab Assistant**

- Assisted 30 students weekly in the introductory computer science class (Compsci C8), which consisted of Python labs/projects using Jupyter notebooks and the datascience library.

**Wu Research Group, UC Riverside** May to Aug. 2017
**Research Intern**

- Took on an NSF-funded project analyzing polyelectrolyte complexation of bioadhesives using polymer density functional theory (PDFT).
- Used a genetic algorithm to optimize chain length and adhesion for sustainable adhesives used in healthcare.
- Advised by Dr. Jianzhong Wu and PhD candidate Alejandro Gallegos

## Projects (tmprk.github.io/projects)

**Sticker Manager - macOS** Dec. 2020

- A native macOS application to create, manage, and paste stickers on the fly.

## Activities

**Volunteer at St. Jude Medical Center** Oct. 2015 to Mar 2018

- Managed and delivered specimen in a fast-pace environment.
- Answered and directed patient phone calls and distributed paperwork to lab sections when necessary.

## Skills

- Python, Swift, R, Javascript, HTML/CSS
- Figma, Sketch, Photoshop, Illustrator
